## Skills

### WEB DEVELOPMENT

HTML

CSS

JavaScript

Node JS

React JS

Angular JS

Vue JS

Express

MongoDB

MySQL

PHP

Python

AWS

### SOFT SKILLS

Communication

Collaboration

Leadership

Multi-tasking

Planning

Organizing

Proactive, astute, and results-driven professional equipped with well-developed academic qualifications in JavaScript development. Demonstrated ability to work through a problem effectively and provide the best solution. Well versed in implementing diverse web-based applications. Able to identify and adapt to upcoming technology trends. Display an outstanding ability to plan, operate, multitask, organize, coordinate, and implement practices and procedures to bring significant improvements in processes towards the successful attainment of goals.

## Projects

### React Searchbar

A search bar written in React to query an array with characters that match the string entered in the input.

### Static Portfolio

Portfolio implementing HTML, CSS, and JavaScript. My HTML uses semantic tags to make readability better, CSS3 animations and media queries so the website is suitable for all display sizes, and the latest ECMAScript 7 syntax.

### Pokedex

An application utilizing GraphQL and Apollo to query an open source API and map it to a React application. This application displays the top 24 results of the API.

### Movie Search

A React application that interfaces with the MovieDB public API. With this application, you are able to query any movie ever created for a short list of details on that film and related films.

## Employment

### Woz U

Software Developer Mentor

Remote

Oct. 2019 to Current

- Regularly refresh my recollection on in-demand frameworks and libraries for JavaScript, Java, and C#. Communicate with students on a daily basis on topics between the subject matter, project planning, and time management
- Continuously identify and execute new opportunities for growth
- Help in troubleshooting problems
- Adhered to a busy schedule successfully

### BouMatic

Quality Control Chemical Tech

Fresno, CA

Aug. 2018 to Oct. 2019

- Mastered an inventory management GUI to query and sent information to databases to keep our inventory accurate, while using lab equipment to get results from chemicals to make sure they are in specification
- Promoted collaboration to identify opportunities, share best practices, and solve problems to achieve the objectives of the organization
- Built lasting relationships through performance and credibility. Developed positive rapport with people at all levels of responsibility

## Education

### Southern Careers Institute

I studied JavaScript development for a total of 660 hours. I learned mostly about Web Development, but also used JavaScript for mobile development with React Native, and Ionic. I had the opportunity to learn how to deploy web applications and build web servers with Node JS. In this program I was able to build various types of applications for the web at least 1 time a week.

Oct. 2018 to Oct. 2019
